

Universal Pole Bracket UPB

F0005585

Product Features:

- Cast aluminium alloy for strength and corrosion resistance.
- universal fitting covering all installation situations on wooden, metal or concrete poles.
- Dimensions: 120mm x 114mm x 46mm

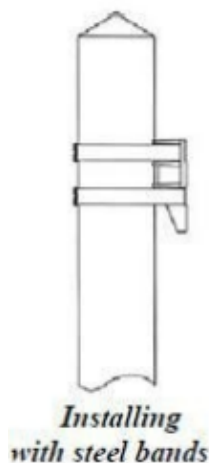

Technical information	
Quantity	1
Working load	5000N
Weight	0.2kg
Material	Aluminum alloy
Colour	Silver

Installation guide

Installing with bolts

The UPB bracket can be mounted on any type of pole, whether it's pre-drilled or not, using two stainless steel bands measuring 20x0.7 mm, along with two buckles. Typically, two one-meter bands are recommended for each bracket installation.

Installing with bolts

if the top of the pole is pre-drilled (as with wooden poles or sometimes concrete poles), the UPB bracket can also be fastened using a 14- or 16-mm bolt. The bolt should have a length of at least the pole's diameter plus 50 mm to account for the bracket's thickness.
